Buildings, Books and Beyond: Mechanics' Worldwide 2004

Buildings, Books and Beyond is a collection of over 50 papers (430 A4 pages) from the first ever international conference of mechanics' institutes, held at Swinburne University, Prahran Campus in September 2004. The papers highlight a huge variety of mechanics' institutes, athenaeums and schools of arts from within Australia and abroad – their buildings, histories, activities, libraries, archives and heritage issues.

This is the second edition (available in paperback and CD versions) and it is an important publication about a little known yet significant part of Australia's cultural heritage.
